## REFERENCE COPY OF TECHNICAL DOCUMENTATION FOR ACCESSIONED ELECTRONIC RECORDS

(Copied: April 22, 2004)

### CHIPS (Case Handling Information Processing System) Closed Cases 1984-1999 Documentation

#### Record Group 25: Records of the National Labor Relations Board

The National Archives and Records Administration (NARA) has been accepting electronic records into its holdings since the early 1970s. Technical documentation has accompanied each transfer of electronic records. The documentation is necessary to understand the meaning of the digitized bits of information within the electronic records.

Over the decades, NARA has had different procedures for compiling technical documentation into an organized unit for researchers, and different expectations regarding the content and extent of any NARA-produced portions of the documentation. Consequently, the structure, organization and contents of the documentation reflect the procedures in place when the technical documentation was compiled and arranged and may include out of date addresses, telephone numbers, or other items of unrevised information related to the agency that created or transferred the documentation and electronic records to NARA, to the NARA unit that processed these materials, or to the physical media of the electronic records files.

In creating the reference copy of the documentation package, NARA staff have selected from the technical and/or supplementary documentation available for this series or file(s). We have annotated or highlighted the table of contents that follows to indicate which portions of the full documentation for this series or file are included in this reference copy of documentation. Any materials not included here are available upon request. Any user notes prepared after the table of contents was prepared appear before the table of contents. This documentation will differ in structure, organization and contents from technical documentation for other series or files of accessioned electronic records. The readability and visual quality are also variable.

## Supplemental User Note

### **Case Handling Information Processing System (CHIPS) Closed Cases, 1984-1999 Accession Number NN3-025-03-003**

During the loading of this series in the Access to Archival Databases (AAD) system, NARA staff realized there was insufficient documentation for the County Coded in the C Master and R Master files. Staff determined the agency used the 1976 GSA Worldwide County Geographic Code list for the fields in these files

The Agency supplied a copy of the coded in an Excel spreadsheet with the county codes for each state placed on a separate sheet. NARA staff printed each sheet and place them in box 2, folder 75 of the documentation for the series.

### Case Handling Information Processing System (CHIPS) Closed Cases, 1984-1999 Accession Number NN3-025-03-003

In June 2005, the National Archives and Records Administration (NARA) converted the twenty data files from the Case Handling Information System (CHIPS) Closed Cases, 1984-1999. Originally preserved as comma-separated value (.csv) files, the files were reformatted and preserved as fixed length records. One of the reasons for this conversion was the planned inclusion of the files in the online utility, Access to Archival Databases (AAD).

Both sets of records (comma-separated value and fixed length) have been preserved by the National Archives and are available for research.

At the time of their conversion to fixed length files, the files were re-verified in keeping with standard NARA practice. Layout reports were added to the documentation as Supplemental NARA Documentation in box 1, folder 2. Load Reports and verification reports were added to the documentation as Supplemental NARA Processing Materials (box 1, folder 66). Concurrently, the original list of documentation was amended to reflect the new folder order.

The list below shows the file titles for the reformatted files with the corresponding XMIS number. The file titles of the fixed length files are identical to the .csv files, with the addition of “\_FL” at the end of the file title.

## **Supplemental User Note**

### **Case Handling Information Processing System (CHIPS) Closed Cases, 1984-1999 Accession Number NN3-025-03-003**

In April 2007, the National Archives and Records Administration reviewed the metadata of this series as part of the process for including it in the Access to Archival Databases (AAD). During the process, NARA staff realized there was insufficient documentation for the C\_Industry (Industry Classification Code) field. The field appears in both the CHPS\_TC\_MAST\_84\_99 and CHPS\_TR\_MAST\_84\_99 data layouts.

The Agency supplied a copy of the pages in the “old A&R documentation” where the field’s codes are explained. However, the documentation no longer exists according to Dolores Melick of the NLRB. Ms. Melick works in the Office of Information Technology and designed the data entry functionality of the old “A&R” system which became CHIPS. During a telephone conversation with NARA staff, she stated that the system used the SIC Codes from 1972 up until the end of 1987. They used the SIC Codes from 1987 for the remainder of the years.

#### USER NOTE 1

The record layouts for the data files are hard copy printouts from the Case Handling Information Processing System (CHIPS) tables in Access 97 Format. These printouts were made by NARA staff from the CHIPS Closed Data in Access 97 Format provided by the National Labor Relations Board (NLRB). The record layouts present the columns (data fields) of each table in the order in which they appear for that table in the actual data record.

For the field descriptions and codes the agency provided record layouts and codes for another version of the CHIPS data: CHIPS Name and Address File Layout, CHIPS Master File Layout, Election File, and CHIPS Codes and Descriptions. This version of the record layout field locations does not apply to the CHIPS tables data. But the descriptions and codes are the same for both versions of data.

Attached to this user note, attachment #1, is a blank copy of the National Labor Relations Board Regional Office Closed Case Report, a one page report containing the codes for Remedy.

In some instances the agency does not provide codes for a field. For example the field "Update Control," in the C Formal 1 and other tables, is no longer used and no codes were provided. That field was used by older systems for control reasons, but has no value to the CHIPS data.

Also attached to this user note, attachment #2, is a two-page hardcopy printout that NARA staff printed from the CD-ROM provided by NLRB. This printout contains the names and descriptions of the data files (tables) contained in the CHIPS Closed Data.

*Created 3/21/2002 NLRB*

Per order of Operations Management Division at the NLRB:

Please note that some records do NOT show a close date on them. Some records may possibly have a 2000 file or close date. These records are, however, considered closed. Please assume that these records are closed prior to October 1, 1999.

There have been cases previously in CHIPS that are also in the newer CATS system. The CHIPS cases have been removed from CHIPS since they are in CATS now.

## **18 Votes Against Union**

Number of Votes cast against union(s).

## **19 Challenged Ballots**

Count of Challenged Ballots.

## **20 Elections Control**

Used by National Labor Relations Board to eliminate duplicate counting of records. Whenever two or more unions petition separately for the same unit, or when an employer and one or more unions petition separately for the same unit, the same election results are entered on two or more records. Similarly, when the same unit in a case is voted more than once, the first election having results which are inconclusive, there will be two or more units voted in one given case.

To count the results given on the record would cause inaccurate numbers above actual figure in order to prevent this duplication, the control code is set up as a means of counting the actual number of cases and elections.

**Group A** - Elections results entered on one type of case only - no cross petition, one or more units.

- 1 - One or more elections in case, count election case and data.
- 2 - More than one election in case, count for election data only.

**Group B** - Election results entered on one type of case only - cross petitions with one or more units.

- 3 - One or more elections in cases, count election and case data.
- 4 - One or more elections in cases, count case data only.
- 5 - One or more elections in cases, count election data only.
- 6 - One or more elections in cases, DO NOT count for election or case data.

**Group C** - Election results entered on cases of different types - cross petitions.

- 7 - One or more elections in cases, count case and election data in mixed and unmixed groups.
- 8 - One or more elections in cases, count case data in mixed and unmixed groups, election data in unmixed groups only.
- 9 - All Sonotone election cases.

R or “-“ - One or more elections in cases, DO NOT count case data in mixed or unmixed groups; count election data in mixed groups and unmixed groups.

“X” or “&”- One or more elections in cases, DO NOT count case data in mixed or unmixed groups; count election data in unmixed groups.

### Situation Coding

In order to distinguish a single case coded 001 and a suffixed case coded 001, a control code for Situation is coded as follows:

#### Single Case

Identified by a code 5

#### Suffixed Case

- The lead case will have 001 in Suffix Field and 1 in Situation
- Following cases will have 002 through 999 in Suffix Field and 4 in Situation Field

#### Companion Case

- An individual of some other party filed similar charges against an employer and a union resulting in a CA and CB case;
- CC and CD charges (or any combination of CB, CC, CD) are files against the same union.
- The Key case in this kind of Situation will always be the case with the lowest docket number of the lowest type (CA,CB,CC,CD,CE,CG,CP) with a suffix of 001
- The Key case in this kind of grouping of cases will have a 2 in Situation
- The Sub-Key in this kind of a group will be the next type(CB,CC,CD,CE,CG,CP) case with 001.
- The Sub-Key (campanion case) will have a 3 in Situation
- Suffixed Cases can be included in this type of group

#### Cross Filing

- A proper defination is needed at this point
- The Key case in this kind of Situation will always be the case with the lowest docket number of the lowest type (CA,CB,CC,CD,CE,CG,CP) with a suffix of 001
- The Key case in this kind of grouping of cases will have a 6 in Situation
- The Sub-Key in this kind of a group will be the next type(CB,CC,CD,CE,CG,CP) case with 001.
- The Sub-Key (campanion case) will have a 7 in Situation
- Suffixed Cases can be included in this type of group

## Key Cases and Subordinate Key Cases.

1. Key cases and subordinate key cases apply only to C cases.
2. Key case and subordinate key case coding is independent of any coding that might apply to key consolidated cases and subordinate key consolidated cases once transactions are received in Washington.
3. All suffix 001 cases that are not subordinate to a key case and are not a key case themselves have the following characteristics:
  - a. Key case number = spaces.
  - b. Subordinate key case number = spaces.
  - c. Number of charges = 001.
  - d. Type charge code = 1 if CA case, 2 if CB, 3 if CC, 4 if CD, 8 if CE, } if CG and 9 if CP.
  - e. Related case code = space.
  - f. Situation code = 5.
4. A key case can only have a suffix value of 001 and has the following characteristics:
  - a. Key case number = spaces.
  - b. Subordinate key case number = spaces.
  - c. Number of charges = 002 or greater. The number of charges is equal to 001 plus the number of cases that have the case number of the key case in their key case number field. If 15 cases claim a case as a key case, then the number of charges for the key case = 016.
  - d. Type charge code = 1 if subordinate case is a CA case, 2 if subordinate case is a CB case, etc. However if more than one type of case is subordinate to the key case, then type charge code = X.
  - e. Related case code = space.
  - f. Situation code = 1 if only cases with suffix greater than 001 are subordinate to the key case; 2 if a suffix 001 case is subordinate and the subordinate case has a related case code of 3 (companion case); 6 if a suffix 001 case is subordinate and the subordinate case has a related case code of 2 (crossfiling).

5. A subordinate case with a suffix value of 001 has the following characteristics:

- a. Key case number = the case number of the key case to which the case is subordinate. A CB case can be subordinate to a CA case, a CC case can be subordinate to a CB case or a CA case. But this relationship applies only one way; it can not be applied in an opposite direction, i.e. a CA case cannot be subordinate to a CB case or a CC case, a CB case cannot be subordinate to a CC case. Nor can the ruling be applied in a lateral direction, i.e. a CA suffix 001 case cannot be subordinate to another CA suffix 001 case, a CB suffix 001 case to another suffix 001 CB case, etc.
- b. Subordinate key case number = spaces.
- c. Number of charges = spaces.
- d. Type charge code = 1 if key case is a CA case, 2 if key case is a CB case, etc. However if more than one type of case is subordinate to the key case, then type charge code = X.
- e. Related case code = 2 (crossfiling) or 3 (companion case), with 2 being a default code.
- f. Situation code = 7 when related case code = 2; 3 when related case code = 3.

6. A subordinate case with a suffix value greater than 001 has the following characteristics:

- a. Key case number = its own case number but with a suffix value of 001 if the key case number for the suffix 001 case is equal to spaces. If the suffix 001 case for this case has a key case number value, then this value also becomes the key case number of the case whose suffix value is greater than 001. Case 01 CB 00200 002 would be expected to have 01 CB 00200 001 as its key case number. But if case 01 CB 00200 001 has a value of 01 CA 03500 001 for its own key case number field, then case 01 CB 00200 002 also has 01 CA 03500 001 as its key case number.
- b. Subordinate key case number = spaces if the key case number is equal to its own case number except that the suffix value is 001. If the key case number contains any other case number, then the subordinate key case number is equal to its own case number except that the suffix value is 001. Case 01 CB 00200 002 would be expected to have 01 CB 00200 001 as its key case number. But if another case number appears in the key case field the subordinate key case number will equal 01 CB 00200 001.
- c. Number of charges = spaces.
- d. Type charge code = 1 if key case is a CA case, 2 if key case is a CB case, etc. However if more than one type of case is subordinate to the key case, then type charge code = X.

e. Related case code = 1.

f. Situation code = 4.

**APPENDIX****GLOSSARY OF TERMS USED IN STATISTICAL TABLES**

The definitions of terms contained in this glossary are not intended for general application but are specifically directed toward increasing comprehension of the statistical tables that follow. Thus the definitions are keyed directly to the terms used in such tables.

**Adjusted Cases**

Cases are closed as "adjusted" when an informal settlement agreement is executed and compliance with its terms is secured. (See "Informal Agreement," this glossary.) In some instances, a written agreement is not secured but appropriate remedial action is taken so as to render further proceeding unnecessary. A central element in an "adjusted" case is the agreement of the parties to settle differences without recourse to litigation.

**Advisory Opinion Cases**

See "Other Cases—AO" under "Types of Cases."

**Agreement of Parties**

See "Informal Agreement" and "Formal Agreement," this glossary. The term "agreement" includes both types.

**Amendment of Certification Cases**

See "Other Cases—AC" under "Types of Cases."

**Backpay**

Amounts of money paid or to be paid employees as reimbursement for wages lost because they were discriminatorily discharged or unlawfully denied employment, plus interest on such money. Also included is payment for bonuses, vacations, other fringe benefits, etc., lost because of the discriminatory acts, as well as interest thereon. All moneys noted in table 4 have been reported as paid or owing in cases closed during the fiscal year. (Installment payments may protract some payments beyond this year and some payments may have actually been made at times considerably in advance of the date a case was closed; i.e., in a prior fiscal year.)

**Backpay Hearing**

A supplementary hearing to receive evidence and testimony as to the amount of backpay due discriminatees under a prior Board or court decree.

**Backpay Specification**

The formal document, a "pleading," which is served on the parties when the Regional Director and the respondent are unable to agree as to the amounts of backpay due discriminatees pursuant to a Board order or court decree requiring payment of such backpay. It sets forth in detail the amount held by the Regional Director to be owing each discriminatee and the method of computation employed. The specification is accompanied by a notice of hearing setting a date for a backpay hearing.

**Case**

A "case" is the general term used in referring to a charge or petition filed with the Board. Each case is numbered and carries a letter designation indicating the type of case. See "Types of Cases."

**Certification**

A certification of the results of an election is issued by the Regional Director or the Board. If a union has been designated as the exclusive bargaining representative by a majority of the employees, a certification of representative is issued. If no union has received a majority vote, a certification of results of election is issued.

**Challenges**

The parties to an NLRB election are entitled to challenge any voter. At the election site, the challenged ballots are segregated and not counted when other ballots are tallied. Most frequently, the tally of unchallenged ballots determines the election and the challenged ballots are insufficient in number to affect the results of the election. The challenges in such a case are never resolved, and the certification is based on the tally of (unchallenged) ballots.

When challenged ballots are determinative of the result, a determination as to whether or not they are to be counted rests with the Regional Director in the first instance, subject to possible appeal to the Board. Often, however, the "determinative" challenges are resolved informally by the parties by mutual agreement. No record is kept of nondeterminative challenges or determinative challenges which are resolved by agreement prior to issuance of the first tally of ballots.

**Charge**

A document filed by an employee, an employer, a union, or an individual alleging that an unfair labor practice has been committed. See "C Case" under "Types of Cases."

**Complaint**

The document which initiates "formal" proceedings in an unfair labor practice case. It is issued by the Regional Director when he or she concludes on the basis of a completed investigation that any of the allegations contained in the charge have merit and adjustment or settlement has not been achieved by the parties. The complaint sets forth all allegations and information necessary to bring a case to hearing before an administrative law judge pursuant to due process of law. The complaint contains a notice of hearing, specifying the time and place of hearing.

**Election, Runoff**

An election conducted by the Regional Director after an initial election, having three or more choices on the ballot, has turned out to be inconclusive (none of the choices receiving a majority of the valid votes cast). The Regional Director conducts the runoff election between the choices on the original ballot which received the highest and the next highest number of votes.

**Election, Stipulated**

An election held by the Regional Director pursuant to an agreement signed by all the parties concerned. The agreement provides for the waiving of hearing and the

establishment of the appropriate unit by mutual consent. Postelection rulings are made by the Board.

### **Eligible Voters**

Employees within an appropriate bargaining unit who were employed as of a fixed date prior to an election, or are otherwise qualified to vote under the Board's eligibility rules.

### **Fees, Dues, and Fines**

The collection by a union or an employer of dues, fines, and referral fees from employees may be found to be an unfair labor practice under Section 8(b)(1)(A) or (2) or 8(a)(1) and (2) or (3), where, for instance such moneys were collected pursuant to an illegal hiring hall arrangement, or an invalid or unlawfully applied union-security agreement; where dues were deducted from employees' pay without their authorization; or, in the cases of fines, where such fines restrained or coerced employees in the exercise of their rights. The remedy for such unfair labor practices usually requires the reimbursement of such moneys to the employees.

### **Fines**

See "Fees, Dues, and Fines."

### **Formal Action**

Formal actions may be documents issued or proceedings conducted when the voluntary agreement of all parties regarding the disposition of all issues in a case cannot be obtained, and where dismissal of the charge or petition is not warranted. Formal actions, are, further, those in which the decision-making authority of the Board (the Regional Director in representation cases), as provided in Sections 9 and 10 of the Act, must be exercised in order to achieve the disposition of a case or the resolution of any issue raised in a case. Thus, formal action takes place when a Board decision and consent order is issued pursuant to a stipulation, even though the stipulation constitutes a voluntary agreement.

### **Formal Agreement (in unfair labor practice cases)**

A written agreement between the Board and the other parties to a case in which hearing is waived and the specific terms of a Board order agreed upon. The agreement may also provide for the entry of a consent court decree enforcing the Board order.

### **Compliance**

The carrying out of remedial action as agreed upon by the parties in writing (see "Formal Agreement," "Informal Agreement"); as recommended by the administrative law judge in the decision; as ordered by the Board in its decision and order; or decreed by the court.

### **Dismissed Cases**

Cases may be dismissed at any stage. They are dismissed informally when, following investigation, the Regional Director concludes that there has been no violation of the law, that there is insufficient evidence to support further action, or for a variety of other reasons. Before the charge is dismissed, however, the charging party is given the opportunity to withdraw the charge by the administrative law judge, by the Board, or by the courts through their refusal to enforce orders of the Board.

**Dues**

See "Fees, Dues, and Fines."

**Election, Consent**

An election conducted by the Regional Director pursuant to an agreement signed by all parties concerned. The agreement provides for the waiving of a hearing, the establishment of the appropriate unit by mutual consent, and the final determination of all postelection issues by the Regional Director.

**Election, Directed****Board-Directed**

An election conducted by the Regional Director pursuant to a decision and direction of election by the Board. Postelection rulings are made by the Regional Director or by the Board.

**Regional Director-Directed**

An election conducted by the Regional Director pursuant to a decision and direction of election issued by the Regional Director after a hearing. Postelection rulings are made by the Regional Director or by the Board.

**Election, Expedited**

An election conducted by the Regional Director pursuant to a petition filed within 30 days of the commencement of picketing in a situation in which a meritorious 8(b)(7)(C) charge has been filed. The election is conducted under priority conditions and without a hearing unless the Regional Director believes the proceeding raises questions which cannot be decided without a hearing.

Postelection rulings on objections and/or challenges are made by the Regional Director and are final and binding unless the Board grants an appeal on application by one of the parties.

**Election, Rerun**

An election held after an initial election has been set aside either by the Regional Director or by the Board.

**Informal Agreement (in unfair labor practice cases)**

A written agreement entered into between the party charged with committing an unfair labor practice, the Regional Director, and (in most cases) the charging party requiring the charged party to take certain specific remedial action as a basis for the closing of the case. Cases closed in this manner are included in "adjusted" cases.

**Injunction Petitions**

Petitions filed by the Board with respective U.S. district courts for injunctive relief under Section 10(j) or Section 10(e) of the Act pending hearing and adjudication of unfair labor practice charges before the Board. Also, petitions filed with the U.S. court of appeals under Section 10(e) of the Act.

**Jurisdictional Disputes**

Controversies between unions or groupings of employees as to which employees will perform specific work. Cases involving jurisdictional disputes are received by the Board through the filing of charges alleging a violation of Section 8(b)(4)(D).

They are initially processed under Section 10(k) of the Act which is concerned with the determination of the jurisdictional dispute itself rather than with a finding as to whether an unfair labor practice has been committed. Therefore, the failure of a party to comply with the Board's determination of dispute is the basis for the issuance of an unfair labor practice complaint and the processing of the case through usual unfair labor practice procedures.

### **Objections**

Any party to an election may file objections alleging that either the conduct of the election or the conduct of a party to the election failed to meet the Board's standards. An election will be set aside if eligible employee-voters have not been given an adequate opportunity to cast their ballots, in secrecy and without hindrance from fear or other interference with the expression of their free choice.

### **Petition**

See "Representation Cases." Also see "Other Cases—AC, UC, and UD" under "Types of Cases."

### **Proceeding**

One or more cases included in a single litigated action. A "proceeding" may be a combination of C and R cases consolidated for the purpose of hearing.

### **Representation Cases**

This term applies to cases bearing the alphabetical designations RC, RM, or RD. (See "R Cases" under "Types of Cases," this glossary, for specific definitions of these terms.) All three types of cases are included in the term "representation" which deals generally with the problem of which union, if any, shall represent employees in negotiations with their employer. The cases are initiated by the filing of a petition by a union, an employer, or a group of employees.

### **Representation Election**

An election by secret ballot conducted by the Board among the employees in an appropriate collective-bargaining unit to determine whether the employees wish to be represented by a particular labor organization for purposes of collective bargaining. The tables herein reflect only final elections which result in the issuance of a certification of representative if a union is chosen, or a certification of results if the majority has voted for "no union."

### **Situation**

One or more unfair labor practice cases involving the same factual situation. These cases are processed as a single unit of work. A situation may include one or more CA cases, a combination of CA and CB cases, or combination of other types of C cases. It does not include representation cases.

### **Types of Cases**

#### **General:**

Letter designations are given to all cases depending upon the subsection of the Act allegedly violated or otherwise describing the general nature of each case. Each of the letter designations appearing below is descriptive of the case it is associated with.

**C Cases (unfair labor practice cases)**

A case number which contains the first letter designation C, in combination with another letter, i.e., CA, CB, etc., indicates that it involves a charge that an unfair labor practice has been committed in violation of one or more subsections of Section 8.

**CA:**

A charge that an employer has committed unfair labor practices in violation of Section 8(a)(1), (2), (3), (4), or (5), or any combination thereof.

**CB:**

A charge that a labor organization has committed unfair labor practices in violation of Section 8(b)(1), (2), (3), (5), or (6), or any combination thereof.

**CC:**

A charge that a labor organization has committed unfair labor practices in violation of Section 8(b)(4)(i) and/or (A), (B), or (C), or any combination thereof.

**CD:**

A charge that a labor organization has committed an unfair labor practice in violation of Section 8(b)(4)(i) or (ii)(D). Preliminary actions under Section 10(k) for the determination of jurisdictional disputes are processed as CD cases. (See "Jurisdictional Disputes" in this glossary.)

**CE:**

A charge that either a labor organization or an employer, or both jointly, have committed an unfair labor practice in violation of Section 8(e).

**CG:**

A charge that a labor organization has committed unfair labor practices in violation of Section 8(g).

**CP:**

A charge that a labor organization has committed unfair labor practices in violation of Section 8(b)(7)(A), (B), or (C), or any combination thereof.

**R Cases (representation cases)**

A case number which contains the first letter designation R, in combination with another letter, i.e., RC, RD, RM, indicates that it is a petition for investigation and determination of a question concerning representation of employees, filed under Section 9(c) of the Act.

**RC:**

A petition filed by a labor organization or an employee alleging that a question concerning representation has arisen and seeking an election for determination of a collective-bargaining representative.

## RD:

A petition filed by employees alleging that the union previously certified or currently recognized by the employer as their collective-bargaining representative no longer represents a majority of the employees in the appropriate unit and seeking an election to determine this.

## RM:

A petition filed by an employer alleging that a question concerning representation has arisen and seeking an election for the determination of a collective-bargaining representative.

## Other Cases

## AC:

(Amendment of Certification cases): A petition filed by a labor organization or an employer for amendment of an existing certification to reflect changed circumstances, such as changes in the name or affiliation of the labor organization involved or in the name or location of the employer involved.

## AO:

(Advisory Opinion cases): As distinguished from the other types of cases described above, which are filed in and processed by Regional Offices of the Board, AO or "advisory opinion" cases are filed directly with the Board in Washington and seek a determination as to whether the Board would or would not assert jurisdiction, in any given situation on the basis of its current standards over the party or parties to a proceeding pending before a state or territorial agency or a court. (See subpart H of the Board's Rules and Regulations, Series 8, as amended.)

## UC:

(Unit Clarification cases): A petition filed by a labor organization or an employer seeking a determination as to whether certain classification of employees should or should not be included within a presently existing bargaining unit.

## UD:

(Union Deauthorization case): A petition filed by employees pursuant to Section 9(e)(1) requesting that the Board conduct a referendum to determine whether a union's authority to enter into a union-shop contract should be rescinded.

## UD Cases

See "Other Cases—UD" under "Types of Cases."

## Unfair Labor Practice Cases

See "C Cases" under "Types of Cases."

### Union Deauthorization Cases

See "Other Cases—UD" under "Types of Cases."

### Union-Shop Agreement

An agreement between an employer and a labor organization which requires membership in the union as a condition of employment on or after the 30th day following (1) the beginning of such employment or (2) the effective date of the agreement, whichever is the later.

### Unit, Appropriate Bargaining

A grouping of employees in a plant, firm, or industry recognized by the employer, agreed upon by the parties to a case, or designated by the Board or its Regional Director, as appropriate for the purposes of collective bargaining.

### Valid Vote

A secret ballot on which the choice of the voter is clearly shown.

### Withdrawn Cases

Cases are closed as "withdrawn" when the charging party or petitioner, for whatever reasons, requests withdrawal or the charge of the petition and such request is approved.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Allegations Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Allegations table data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table C Case Address Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table C Case Address data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table C Case Names Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table C Case Names data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table C Formal3 Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table C Formal3 data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table C Master Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table C Master data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table R Case Blocking Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table R Case Blocking data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table R Formal1 Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table R Formal1 data file.

## NATIONAL ARCHIVES PRODUCED FILE LISTING

The National Labor Relations Board transferred the Case Handling Information Processing System (CHIPS), Closed Cases, 1984-1999, Table R Master Data File to the National Archives and Records Administration (NARA) on one CD-ROM. The data was in ACCESS 1997 Data Base Table format. Upon arrival, NARA staff copied the data file to one 18-track 3480 tape cartridge, 37871 bpi, with ANSI standard labels, using ASCII character set in Comma Separated Value (CSV) format with text values enclosed by quotation marks. The data file was blocked at 12,000 characters per block. NARA staff then produced the following printout from the NARA-created copy. This printout is a character representation of the first few records from the Table R Master data file.
